

FROM THEORY TO PRACTICE: Translational Medical Education Research

December 31, 2025

IN COLLABORATION WITH THE COLLEGE OF
MEDICINE , DEPARTMENT OF MEDICAL EDUCATION,
INNOVATION AND COMPETENCY DEPARTMENT UNIT.

OBJECTIVES:

- Explain how robust study design and statistical methods contribute to translating educational theory into measurable practice-based outcomes.
- Identify common methodological challenges in medical education research and describe approaches to address them.
- Apply principles of study design and analysis to develop a plan for evaluating an educational intervention in your own context.

Prof. Alaa Althubaiti

A Professor of Biostatistics at the College of Medicine, King Saud bin Abdulaziz University for Health Sciences. One of the top 2% of scientists by Stanford Elsevier and an expert on measurement error models, quality control, and experimental design.
