sessions with a  
specialist

04

During your hospital visits  
while waiting for your  
appointment

The screenshot shows the MNGHA website header with navigation links: About us, E-Services, Campuses, Patients and Visitors, Professionals, and Media Center. The main content area is titled "Patient Preferences for Receiving Health Education" and includes a breadcrumb trail: E-Participation > E-Consultations and E-Questionnaires > Patient Preferences for Receiving Health Education. The form asks, "In your opinion, how do you prefer to receive health education?" and lists four options: Regular video clips about healthcare, Regular newsletter, Live broadcasts with a specialist in the field, and During your visit to the hospital while waiting for your appointment. A sidebar on the right shows the form status: Finished, Start date 1-08-2025, End date 30-08-2025, Consultation type General, and Beneficiaries All beneficiaries. A green circular icon with a white 'Q' is visible at the bottom left of the form area.

## Submissions Analysis

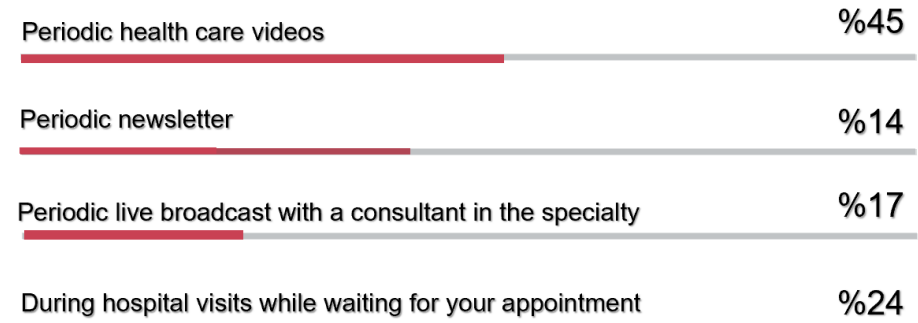

Participation Statistics

01

29

Participants

How would you prefer to receive health education?

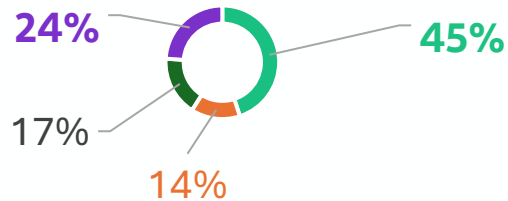

## Analysis of Contributions Based on Decisions (1/2)

Present the general trends of participants' opinions

01

### Data Collection & Analysis

- Regular video clips on health care
- Through periodic newsletters
- Via regular live sessions with a specialist
- During your hospital visits while waiting for your appointment

02

### Recommendations & Decisions

prefer receiving health education through periodic video clips that present healthcare topics in a simple and clear manner. Meanwhile, 24% of participants preferred receiving education during their presence in the hospital while waiting for their appointment. Additionally, 17% of participants selected the option of periodic live sessions with a specialized consultant, whereas only 14% considered the periodic newsletter to be the most appropriate method.

The production and publication of periodic short video content for health education will be adopted as the primary awareness channel, as it represents the most preferred method among participants. The focus will be on simplifying the content and presenting it in a clear and engaging manner to ensure easier understanding.

## Analysis of Contributions Based on Decisions (2/2)

Present the general trends of participants' opinions

### 03

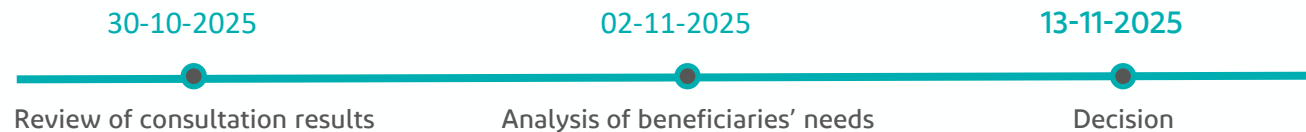

#### Linking the Decision to the Final Decision

Based on the consultation results:  
Due to the limited number of participants, the consultation will be relaunched on a broader scale with the aim of increasing participation and ensuring greater inclusiveness of beneficiaries' opinions.

### 04

#### Implementation Timeline

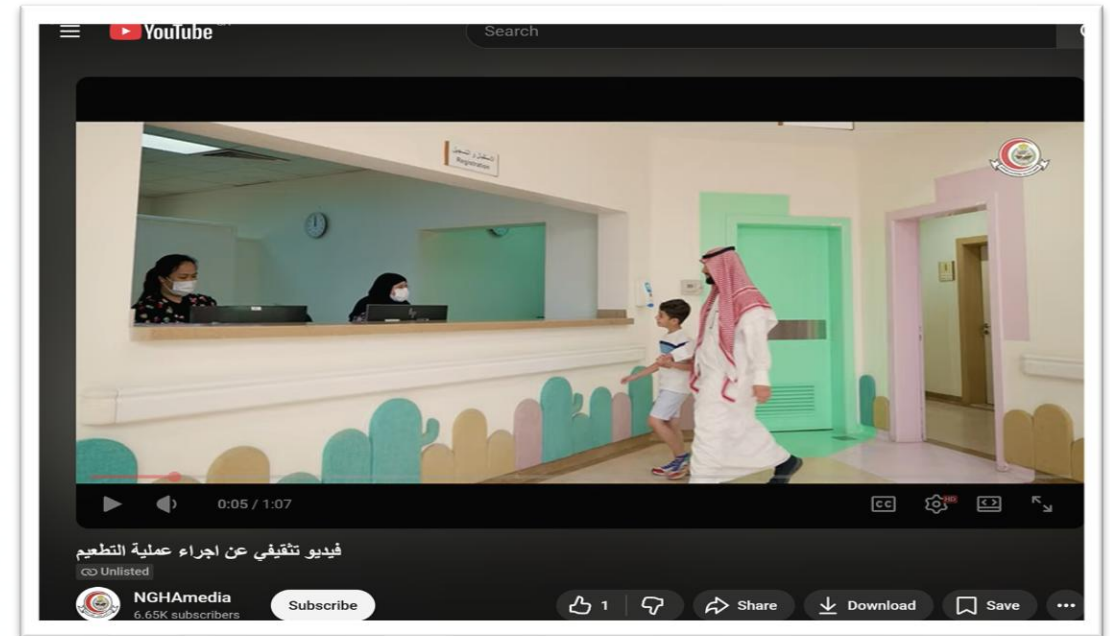

## Results and Decisions

Clarify the recommendations and decisions made based on participants' feedback

The department regularly and systematically publishes educational health videos for beneficiaries as part of our continuous efforts to enhance health awareness and provide reliable, easily accessible content for all audience groups.
